

Tips for Preparing for Lambing - Data Collection

You can harness data on farm to help you monitor success

- **Pre-lambing meeting** to communicate goals with the team - or signage in shed to dictate best practice
- **Tag lambs** to aid with collection
- Record lamb **birthweights**
- Record **lambing ease** or any issues
- Record any **incidence of disease in lambs and ewes**

Any data collected will be useful - aim to collect as much as you can.
