

Tips for Outwintering Cattle

- Test **forage quality** - don't leave it up to chance
- Get confident in monitoring **body condition score**, monitor for subtle changes and adjust your grazing accordingly
- Ensure there is a provision for **shelter** if required
- Look for **rumen fill** to ensure cattle are getting enough forage
- Make sure **water** is always clean, fresh and available
- Ensure you have the means to bring **sick animals** inside if needed
